# **CHILD DEVELOPMENT (CHD)**

(Wallace and Sparks Campuses)

The Child Development program prepares students for employment in the field of Early Care and Education of children. The program is designed to provide students with the skills and knowledge to work effectively with young children and families. Graduates may be employed as administrators in private preschool programs; as teachers in state pre-kindergarten programs, preschool programs, Head Start, and Early Head Start programs; or as aides in public school systems.

Students can pursue a program certificate or degree in one of two concentrations, short certificate, or a CDA Educational Requirement Certificate. The Administrator concentration includes a general background in Child Development, Business Management, and Childcare Administration skills development. The Educarer concentration focuses on developing competencies involved in the direct care of young children. Both concentrations are designed to allow students to develop a broad base of competencies that will prepare them to guide experiences of children from birth through early childhood. The short certificate is designed to prepare students to enter the field of Early Care and Education and to be an intermediate step for those working toward the program certificate or degree.

Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered.

Note: Wallace Community College has articulation agreements with The University of Alabama's College of Human Environmental Sciences and Athens State University's College of Education. Through these agreements, Wallace Community College Child Development graduates may maximize transfer of course credits and complete most of their four-year degree requirements through distance education opportunities.
