Tracking Trends:

Five-Year Enrollment & Student Outcomes

Five-Year Enrollment & Student Outcomes

Enrollment and instructional demand are increasing while student outcomes improve, resulting in greater use of existing instructional and support space.

- **ACHE Viability:** The ACHE viability data show that most Wallace programs meet state standards for sustainability, while a small number fall below thresholds and will require targeted review and improvement.
- **Adult Education:** Adult Education participation remains steady, supporting access, credential attainment, and workforce readiness for adult learners.
- **Athletics:** Athletic participation continues to support enrollment growth, student engagement, and retention while increasing demand on shared instructional and support spaces.
- **CDL Track:** CDL enrollment reflects sustained workforce demand, reinforcing the need for specialized instructional space and capacity to support program growth.
- **Completion:** Completion totals have increased and stabilized, reflecting improved completion tracking and student success efforts.
- **Credit Hours:** Credit-hour production remains strong and continues to grow, particularly during peak academic terms.
- **Dual Enrollment:** Dual enrollment has grown significantly and now represents a substantial portion of total enrollment and instructional activity.
- **Enrollment Headcount:** Enrollment has increased consistently, with Fall and Spring terms reaching the highest levels in the most recent year.
- **Program Enrollment:** Several programs show sustained or increasing enrollment, while emerging workforce needs indicate demand beyond current offerings.
- **Retention:** Retention rates have improved, indicating effective advising and student support services.
- **Scholarships & Student Aid:** Financial aid and scholarships continue to support access and persistence, contributing to enrollment stability and improved student outcomes.
- **Space Utilization:** Space utilization data show that instructional and workforce programs consistently use specialized facilities across multiple terms, with several programs operating continuously or recurring each semester. This sustained and overlapping use of space indicates high demand, limited scheduling flexibility, and increasing pressure on existing facilities to support ongoing and future program growth.
- **Student Clubs & Organizations:** Club participation reflects broad student engagement and increased utilization of student support and common spaces.
- **Workforce Development:** Workforce and non-credit activity align closely with regional labor-market demand, increasing the need for flexible, purpose-built instructional and training facilities.

What the Data Indicates

- Instructional, workforce, and student support spaces are increasingly utilized during peak academic terms and high-demand training periods.
- Current facilities limit flexibility to scale high-demand programs, add new workforce offerings, and expand student engagement activities.
- Workforce-aligned, dual enrollment, CDL, and non-credit programs require adaptable instructional, lab, and testing spaces to meet employer and student demand.
- Growth in athletics, clubs, and student services increases demand on shared spaces that support engagement, retention, and completion.
- Sustained enrollment growth and improving student outcomes must be supported with adequate space to maintain instructional quality and student success.

Summary

The data reflect strong institutional performance, sustained enrollment, and participation growth, and improving student outcomes, while also revealing increasing pressure on existing instructional, workforce, and student support facilities as demand continues to rise.

GEDs	54	77	50	53	67
HSOs	3	2	2	6	24

Adult Education Completion

Adult Education has demonstrated steady enrollment and consistent credential attainment over the past several years, reflecting sustained community demand and program stability.

- Enrollment has remained strong across multiple years, with 924 participants in 2024–25 and comparable levels in prior years, indicating consistent access and utilization.
- GED and HSO completions in 2024–25 remain solid when compared to previous years, showing continued progress in supporting adult learners toward recognized credentials.
- Multi-year data reflect stability with normal fluctuations, supporting the ongoing role of Adult Education as a key pathway for workforce readiness and student success.

Athletic participation has expanded steadily over the past five years, supported by new programs and sustained student interest. Athletics continues to play a significant role in enrollment, retention, and campus life.

- Participation growth aligns with the addition of new athletic programs.
- Athletics contributes to student recruitment and campus engagement.
- Increased participation places added demand on athletic and support facilities.
- Growth reinforces the need for adequate training, support, and student-athlete spaces.

Fall	37	39	59	66
Spring	66	38	64	
Summer	38	41	54	
Total	141	118	177	66

CDL Enrollment by Semester

The CDL program started on September 19, 2022, for business and industry partners only. Enrollment was opened to the public in the fall of 2024.

Industry Partners Served

- City of Dothan
- Houston County Road and Bridge
- C Spire
- Trawick Construction
- Townsend Building Supply
- U Tech
- Southern Lumber
- Knight's Wrecker Service
- Headland Plumbing & Electric
- Tyson Foods
- Tri Delta

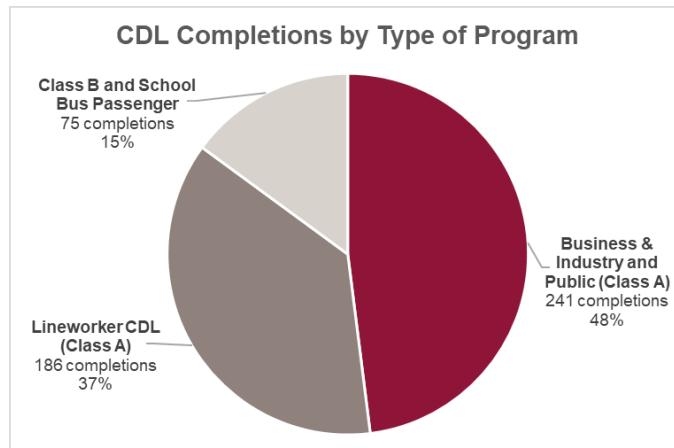

School Systems Served

- Eufaula High School
- Bullock County Schools
- Ozark City Schools
- Dale County Schools
- Abbeville Schools
- Headland Schools
- Lakeside School
- Houston Academy
- Northside Methodist Academy

CDL Track Enrollment

Program	Total
Business & Industry and Public (Class A)	241
Lineworker CDL (Class A)	186
Class B and School Bus Passenger	75
Total Individuals Trained	502

Maximum Enrollment Capacity	9 Students Per Course
Average Waitlist Length	12 Students
Average Time on Waitlist	~ 5 Weeks

CDL enrollment has shown sustained growth over the past five years, reflecting strong workforce demand and program relevance. Continued increases are placing pressure on instructional capacity and physical resources.

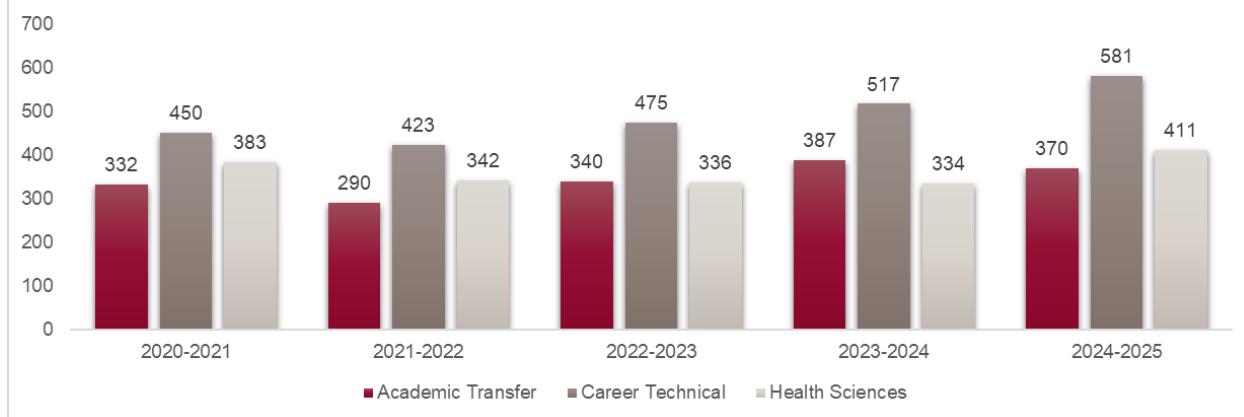

- Enrollment increased from 141 (2022–23) to 177 (2024–25, unduplicated).
- Fall and Summer terms consistently account for the highest participation.
- Early Fall 2025 enrollment indicates continued demand.
- Growth highlights the need for expanded instructional space, equipment, and scheduling flexibility.

Completion

	2020-2021	2021-2022	2022-2023	2023-2024	2024-2025	Total
Academic Transfer	332	290	340	387	370	1719
Career Technical	450	423	475	517	581	2446
Health Sciences	383	342	336	334	411	1806
Total	1165	1055	1151	1238	1362	5971

Completers by Division

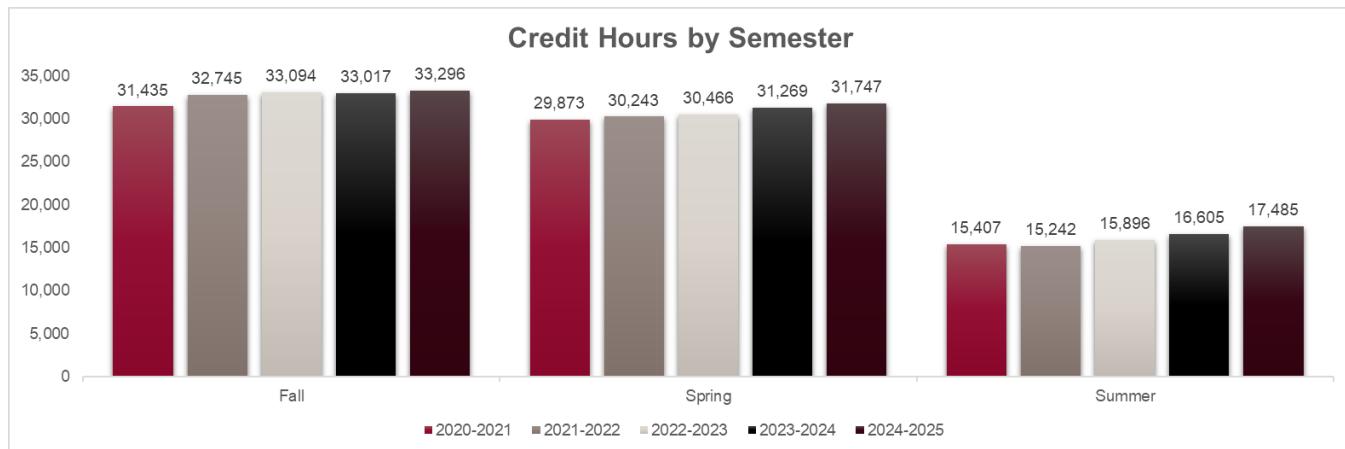

The number of completions has increased and stabilized, reflecting improved completion processes and student success initiatives. These outcomes demonstrate progress toward institutional goals related to credential attainment.

- Improved tracking and award processes support more accurate completion reporting
- Growth in completions aligns with strengthened advising and academic support
- Additional program capacity will support continued increases in completions
- Modern instructional facilities are essential to sustaining workforce-ready outcomes

Summer	15,407	15,242	15,896	16,605	17,485	80,635		

Credit-hour production remains strong and continues to grow, demonstrating consistent student engagement and effective course scheduling. These trends highlight increasing utilization of existing instructional space.

- Fall and Spring terms generate the highest credit-hour production
- Continued growth reflects both enrollment increases and course-load stability
- Existing instructional spaces are operating at or near capacity during peak terms
- Expanded classroom, laboratory, and workforce training space will be needed to sustain growth

Spring	600	620	725	934	974	
Summer	111	135	229	245	196	

Dual Enrollment by Semester

Dual enrollment has experienced significant growth over the past five years and is a key contributor to overall enrollment and credit-hour production. This growth reflects strong partnerships with local school systems and increased early-college participation.

- Dual enrollment represents a growing share of total instructional activity
- Increased participation places added demand on classrooms and scheduling flexibility
- Shared use of space requires adaptable, multi-purpose instructional environments
- Facility planning must account for both traditional and dual-enrolled students

* incarcerated students not included

Enrollment by Semester

Student enrollment has increased steadily over the past five years, reflecting strong institutional demand and effective recruitment and retention efforts. This growth has direct implications for instructional capacity and campus infrastructure.

- Fall and Spring enrollment have reached their highest levels in the most recent year
- Consistent year-over-year growth indicates sustained demand, not short-term fluctuation
- Increased enrollment places additional demand on classrooms, labs, student services, and common spaces
- Facility expansion is needed to support growth while maintaining instructional quality and access

Program Enrollment by Division

Program enrollment trends reflect evolving student interests and workforce needs across the region. The data points to both strong demand in existing programs and opportunities for strategic expansion.

- Several programs show sustained or increasing enrollment
- Emerging workforce needs extend beyond the current program portfolio
- Program growth is constrained by space, equipment, and facility limitations
- New and modernized facilities are critical to support high-demand and workforce-aligned programs

** Fall 2024-2025 retention rates are not yet finalized*

Retention Rates

Student retention has improved over the five-year period, indicating the effectiveness of advising, engagement, and student support strategies. Maintaining this momentum requires continued alignment between student needs and campus infrastructure.

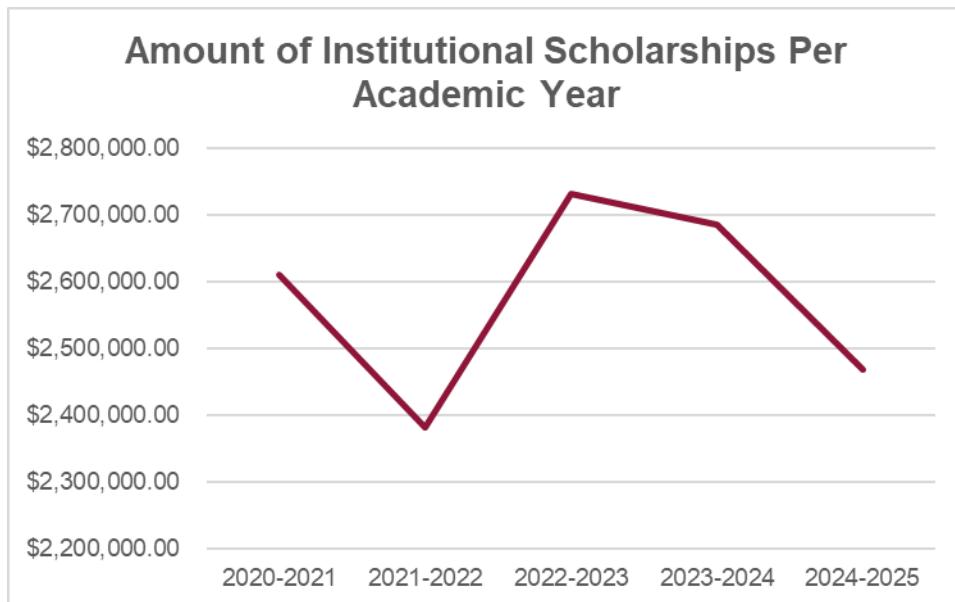

- Retention gains reflect successful student-centered initiatives
- Increased enrollment places additional demand on student support spaces
- Learning environments influence student engagement and persistence
- Facility investments play a critical role in sustaining retention and completion outcomes

COLLEGE

Scholarships

	2020-2021	2021-2022	2022-2023	2023-2024	2024-2025
Total Scholarships	\$2,611,512.70	\$2,381,709.24	\$2,731,360.81	\$2,684,531.78	\$2,469,341.93

Institutional scholarships represent a significant investment in student success and affordability, with funding levels remaining strong despite year-to-year variation.

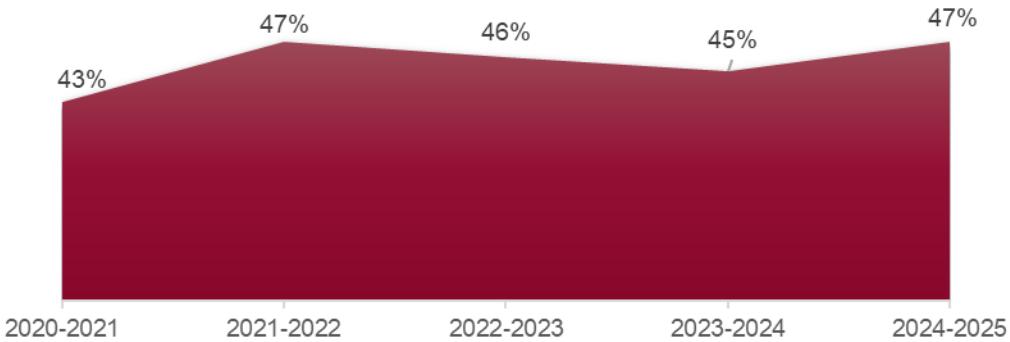

- Total institutional scholarship funding has consistently exceeded \$2.3 million annually over the past five years.
- Scholarship awards increased from 2021–2022 to 2022–2023, indicating expanded institutional support for students.
- Sustained scholarship funding reinforces the need for modern facilities and student-centered spaces that enhance recruitment, retention, and completion.

Students Recieving Title IV

	2020-2021	2021-2022	2022-2023	2023-2024	2024-2025
% of Students Receiving Aid	43%	47%	46%	45%	47%

% of Students Receiving Title IV Aid

Financial aid continues to play a critical role in student access and persistence, with nearly half of all students receiving Title IV assistance over the past five years.

- The percentage of students receiving Title IV aid has remained stable, ranging from 43% to 47% between 2020–2021 and 2024–2025.
- Aid participation peaked in 2021–2022 and again in 2024–2025, reflecting sustained student financial need.
- Consistent aid utilization underscores the importance of accessible support services and infrastructure to serve a high-need student population.

Student Clubs and Organizations

	2021-2022	2022-2023	2023-2024	2024-2025
Total Number of Clubs and Organizations	17	16	16	19

The total number of active student clubs reflects the college's commitment to providing diverse opportunities for student involvement and engagement beyond the classroom.

- Clubs represent a mix of academic, service, leadership, and special-interest organizations.
- The range of clubs supports student connection, involvement, and campus life.

Non-Credit Enrollment Over Time

Workforce and non-credit programming continue to align closely with regional labor-market demand by providing short-term, skills-based training that supports rapid workforce entry and upskilling. Participation patterns reflect strong employer-driven needs, particularly in testing, healthcare, and customized industry training.

- High participation in testing services and workforce credentials reflects employer demand for verified skills, certifications, and job readiness.
- Continued enrollment in healthcare and technical non-credit programs aligns with regional workforce shortages and ongoing hiring needs.
- Business and industry training activity demonstrates active partnerships with employers seeking customized, responsive training solutions.
