Bid Invitation # 1649 Lawn Care & Landscaping - Dothan Campus

A. OBJECTIVE

Wallace Community College – Dothan is seeking bids from qualified and experienced lawn care and landscaping firms to provide commercial groundskeeping services. This Contract intends to provide year-round professional-level lawn care and landscaping services that maintain and improve the current appearance of the College’s grounds, buildings, and facilities.

The performance of Contract activities must not negatively impact the instructional or administrative processes conducted by the College, including noise generation, equipment movement, planting with powered equipment, pesticide application, etc.

B. GENERAL CONTRACTOR REQUIREMENTS

1. Have demonstrated at least (3) years of experience in successfully providing professional quality, uninterrupted lawn care and landscaping services of similar scope and size (20-acre minimum), educational, local, or state government grounds with multiple buildings and facilities, extensive pedestrian traffic at irregular intervals, multiple parking lots and roadways, and irregular terrain.
2. Have sufficient capability and capacity to provide the full scope of services requested herein.
3. Provide all labor, equipment, materials, supplies, and supervision necessary to perform the contract and maintain the overall visual appearance, cleanliness, and health of the campus grounds.
4. Provide necessary automobile, general liability, and workman’s compensation insurance as currently required by Alabama law.
5. Provide current state/city/county business licenses and general contractor’s license (if applicable).
6. Provide a point of contact to act as contract manager to ensure compliance with contract provisions.
7. Attend meetings as needed with the College, which may include a pre-bid meeting, pre-award meeting, and periodic progress/resolution meetings. The details of the meetings will be provided as scheduled.
8. Each Contractor will assume the responsibility for visiting and fully inspecting the site of the proposed work to familiarize themselves with the existing conditions relating to specifications detailed herein.
9. Bidders will be responsible for adhering to any equipment manufacturer’s recommendations for safe equipment operation and any recommended safety inspections.
10. All equipment safety guards/covers are to be intact at all times when operating on college property.
11. Ability to perform all services on a consistent schedule (attached) and in a manner that ensures the campus remains clean, attractive, and safe for students, staff, and visitors.

C. **BID SPECIFICATIONS / SCOPE OF WORK**

1. **Litter and Debris Removal**: Routine removal of paper, trash, fallen limbs, and other debris from all grounds, walkways, parking lots, and landscaped areas.
 - a. Remove paper, limbs, and other debris from the serviced area before each cutting.
 - b. Clean up any paper, limbs, or other debris or remnants remaining after the cutting, including readily visible parking lot debris such as food wrappers, empty beverage bottles, etc.
2. **Mowing and Edging**: Regular mowing of all designated grass areas and edging along sidewalks, curbs, plant beds, and other paved surfaces.
 - a. While the contractor is responsible for maintaining the areas to academic institution standards, historical data indicates that once-a-week servicing provides an acceptable level of quality and appearance. During the active growing season, weekly cutting is usually required to maintain the desired academic institution appearance standards to avoid unacceptable irregular growth patterns. During periods of less active growing, other tasks such as fine trimming and cutting around buildings, weeding, tree trimming, and general grounds cleanup require attention every other week. Weather conditions and specific requirements of the College may cause this schedule to be varied occasionally, not usually exceeding 15% of normal services.
 - b. Normal grounds maintenance will be accomplished using finishing lawn maintenance type equipment with a bagging or collection device and edging trimmers, blowers, weed eaters, etc. All cuttings, clippings, debris, etc. must be removed with each cutting. Academic institution standards indicate a level of grounds appearance that shows continuous maintenance with a neat, well-maintained appearance. Grass should be mowed between 2 ½ inches and 3 ½ inches during each cutting, with no more than one-third of the grass height being removed at any one cutting. In no case should the grass height be less than 2 ½ inches immediately after cutting.
 - c. Bush hogs, pasture equipment, or other rough cutting systems are not acceptable.
 - d. Services will include edging around all sidewalks, curbs, signs, buildings, and other structures every time the grass is mowed. All trimmings from edging shall be collected and removed.
 - e. Include trimming, edging, and mowing in traffic medians, parking lot islands, and other self-contained structures each time services are provided.
 - f. There are two different zones that should be considered for mowing, edging, and weed eating. The zone map is enclosed. Zone 1 consists of all the areas surrounding instructional spaces and should be completed on Fridays when the student population is the least. Zone 2 consists of all the areas outside of instructional spaces and can be completed any day of the week, but has historically been completed on Thursdays.
3. **Trimming and Pruning**: Hedge trimming, shrub maintenance, and pruning of small trees to maintain proper shape, health, and safety.
 - a. Trim low-hanging tree limbs (those under 12 feet in height) as necessary to maintain a neat, orderly appearance. Trim around tree trunks and base areas. Collect and remove all limbs, leaves, and other debris as a result of trimming activities.
4. **Weed Control**: Weeding, weed-eating, and application of herbicides as needed to maintain weed-free turf, planting beds, and hardscape areas.
 - a. Spray for weed control and growth in parking and asphalt areas. Spraying should be accomplished with such frequency that no weeds are present. Use only approved herbicides with an acceptable MSDS on site. Remove noticeable dead weeds after spraying. Spraying shall be accomplished at times to minimize contact with vehicles, pedestrians, etc.
 - b. Hand pick obvious and unsightly weeds from turf and planting beds as needed.
5. **Raking and Mulching**: Rake leaves, limbs, and debris as needed. Mulching of beds and landscaped areas to promote healthy plant growth and appearance.
6. **Pine Straw Installation**: Lay and maintain pine straw in designated areas.
