INTRODUCTION

The purpose of this manual is to provide comprehensive information regarding policies and procedures governing the Respiratory Therapist Program of Wallace Community College. These policies are designed to ensure consistent, equitable, and standardized practices across all program locations, thereby supporting fairness and uniformity in the delivery of the Respiratory Therapy Program.

Any revisions or addendum to this handbook will be provided in writing to each student and will become effective at the time specified on the written notice.

The faculty of the Respiratory Therapist Program welcomes each student and encourages each one in attaining his/her career goals. It is the intent of the faculty to support the success of each student by providing additional help and cooperation as needed. The faculty is available to answer any questions and assist with any problems that may arise.

Ms. Judith L. Harrell, MHS, BS, RRT
Program Director
Respiratory Therapist Program
Wallace Community College
jharrell@wallace.edu

Mission, Philosophy, and Purpose

Program Mission Statement

The mission of the Respiratory Therapy Program at Wallace Community College is to prepare graduates to become **competent, confident, and professional respiratory therapists** who provide safe, effective, and compassionate cardiopulmonary care.

The program is committed to preparing graduates with the **knowledge, technical skills, critical thinking abilities, and professional behaviors** required to meet the respiratory care needs of patients and the healthcare workforce. The program supports workforce development by preparing graduates to serve the healthcare needs of the community while adapting to advancements in respiratory care technology and treatment of cardiopulmonary disease.

The mission and philosophy of the Respiratory Therapy Program are consistent with the mission and values of Wallace Community College and the profession of respiratory care.

Program Philosophy

The Respiratory Therapy Program is centered on **patient-focused healthcare**. The quality of respiratory care delivered to patients is directly influenced by the preparation and competence of program graduates. Therefore, the program's primary goal is to prepare graduates to function as **competent, entry-level advanced respiratory care practitioners**.

Graduates of the program are expected to demonstrate excellence in:

- Cognitive knowledge
- Psychomotor skills
- Professional attitudes and behaviors

The faculty believe respiratory care education should be built upon a **strong scientific foundation** that integrates biological and behavioral sciences while fostering:

- Critical thinking
- Effective communication
- Professional responsibility
- Problem-solving skills
- Interpersonal collaboration

The curriculum is designed to progress **from simple to complex concepts**, allowing

students to develop the competencies necessary to achieve program learning outcomes and professional practice standards.

Respiratory therapists function as **integral members of the healthcare team**, working collaboratively with physicians, nurses, and other healthcare professionals to identify, evaluate, and manage cardiopulmonary disorders.

Faculty members serve as **facilitators of learning**, guiding students through an interactive educational process that promotes active participation, accountability, and professional development. The program recognizes that learning is a **lifelong process**, and graduates are encouraged to pursue continued professional growth throughout their careers.

Program Purpose

Consistent with the mission of Wallace Community College, the Respiratory Therapy Program provides students the opportunity to earn an **Associate in Applied Science (AAS) degree in Respiratory Therapy** and prepare for entry into the respiratory care profession.

Graduates of the program are eligible to sit for the credentialing examinations administered by the National Board for Respiratory Care, including:

- Therapist Multiple-Choice Examination (TMC)
- Clinical Simulation Examination (CSE)

Successful completion of these examinations leads to the **Registered Respiratory Therapist (RRT)** credential.

RESPIRATORY THERAPY

Health Profession in Demand

The field of Respiratory Therapy, one of the fastest growing, medical professions, needs dynamic, motivated individuals to serve the needs of critically-ill adults, children, and newborns. In addition, Respiratory Care professionals play an integral part in the rehabilitation of patients suffering from a variety of cardiopulmonary diseases.

Whether in the intensive care unit, emergency room, rehabilitation clinic or even the patient's home, the respiratory care practitioners will be called upon to administer various treatment modalities/medications, perform diagnostic procedures, and/or manage sophisticated life support equipment.

Although the majority of Respiratory Therapists are employed by hospitals, opportunities to practice outside of the standard hospital setting are in demand. Other opportunities for the Respiratory Therapist include emergency transport and education.

Goals and Objectives

The overall goal of the Associate in Applied Science Degree in Respiratory Therapy is “To prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRTs)” as defined by the CoARC. A respiratory therapist is responsible for the administration, under physician's prescription, of many types of breathing therapeutics, utilizing specialized breathing equipment, aerosol, and humidity administration. The respiratory therapist works closely with the physician and also directly with the patient in the treatment situation, an attractive feature of this career.

The Respiratory Therapist Program is accredited by the Commission on Accreditation for Respiratory Care (CoARC).

Required Competencies

Respiratory Therapist Students must demonstrate numerous competencies representing all three learning domains: the cognitive, psychomotor, and affective domains. Students learn, practice, and verify these competencies in a number of settings including the classroom, laboratory, and clinic. Respiratory therapy laboratories provide students with the opportunity to view demonstrations, evaluate and practice with medical devices, and perform simulated clinical procedures. In addition to the cognitive skills required in the classroom, students must demonstrate psychomotor skills in manipulation of patients and equipment, as well as general professional behaviors, like team-building and interpersonal communications. To satisfy laboratory and clinic requirements, students must perform all procedures without critical error.

DISABILITY SUPPORT SERVICES

Wallace Community College will provide reasonable accommodations for students with special needs. Students are responsible for reporting their needs to the ADA Compliance Office and providing proper documentation of their disabilities.

Helpful information, to include the WCC Disability and Accessibility Handbook, can be found on the WCC website (<https://www.wallace.edu/campus-life-resources/disability-support-services/>).

Contact Information for Disability Support Services:

- Wallace Campus: Dr. Ryan Spry, Director, Student and Campus Services, (334) 556-2587
- Sparks Campus: Ms. Terri Ricks, Coordinator, Student Services, (334) 556-4270

ESSENTIAL FUNCTIONS FOR THE RESPIRATORY THERAPIST PROGRAM

The Alabama Community College System endorses the Americans' with Disabilities Act. In accordance with College policy, when requested, reasonable accommodations may be provided for individuals with disabilities.

Physical, cognitive, psychomotor, affective and social abilities are required in unique combinations to provide safe and effective respiratory therapy care. The applicant/student must be able to meet the essential functions with or without reasonable accommodations throughout the program of learning. Admission, progression and graduation are contingent upon one's ability to demonstrate the essential functions delineated for the respiratory therapist program with or without reasonable accommodations. The respiratory therapist program and/or its affiliated clinical agencies may identify additional essential functions. The respiratory therapist program reserves the right to amend the essential functions as deemed necessary.

In order to be admitted and to progress in the respiratory therapist program one must possess a functional level of ability to perform the duties required of a respiratory therapist. Admission or progression may be denied if a student is unable to demonstrate the essential functions with or without reasonable accommodations.

The essential functions delineated are those deemed necessary for the respiratory therapist program. No representation regarding industrial standards is implied. Similarly, any reasonable accommodations provided will be determined and applied to the respective respiratory therapist program and may vary from reasonable accommodations made by healthcare employers.

The essential functions delineated below are necessary for respiratory therapist program admission, progression and graduation and for the provision of safe and effective physical therapy care. The essential functions include but are not limited to the ability to:

FUNCTIONS	EXAMPLES OF CRITERIA
Cognitive and critical thinking abilities are sufficient to make clinical judgments and meet laboratory objectives and requirements.	<ol style="list-style-type: none"> 1. Can comprehend new knowledge and apply it in RPT practice 2. Can analyze situations and identify cause-effect relationships 3. Can organize, program-solve, and make decisions 4. Can meet mental competency requirements of the Alabama Board of Respiratory Therapy. 5. Can compute mathematical problems 6. Can operate a computer after an orientation
Interpersonal abilities are sufficient to interact purposefully and effectively with others.	<ol style="list-style-type: none"> 1. Can establish rapport with individuals 2. Can interchange ideas in a group 3. Can perceive emotions displayed by others 4. Can convey sensitivity, respect, tact, and a mentally healthy attitude in interpersonal relationships
Fine motor skills and hand/eye coordination are sufficient to safely fulfill laboratory objectives and requirements.	<ol style="list-style-type: none"> 1. able to manipulate small objects and dials on equipment 2. Can manipulate objects without extraneous motions, tremors or jerking

	3. Can write the English language legibly, Using correct grammar and syntax.
Auditory ability is sufficient to communicate effectively with others, to monitor and assess patient status, and to fulfill all laboratory objectives and requirements.	1. Can hear high and low frequency sounds, such as telephones, monitor alarms, emergency signals, weak cries of infants and weak calls for help
Visual ability is sufficient to monitor and assess patient status and to fulfill laboratory objectives and requirements. Instruments to enhance or correct vision are portable, usable in small spaces and in varying levels of light and do not disrupt care or cause discomfort to patients.	1. Am able to discern the full spectrum of colors and to distinguish color changes 2. Can accurately read numbers and letters in fine print, such as would appear on therapist or monitoring equipment in varying levels of light (daylight to very dim light) 3. Can read for long periods of time 4. Can read cursive writing such as would be found on patient's charts 5. Can detect changes in the Environment
Tactile ability and sense of smell are sufficient to assess patients and the environment.	1. Can palpate and count pulses 2. The use of a stethoscope to obtain blood pressure and breath sounds. 3. Can discern physical characteristics through touch, such as texture, shape, size, location, and others 4. Can smell body and environmental odors, such as infected wounds or burning electrical equipment
Communication abilities are sufficient to convey thoughts in verbal and written form so that they are understood by others.	1. Has sufficient English language abilities to understand printed materials, classroom lectures; instructional, medical, or other directives; and patient questions and/or responses 2. Has sufficient English language abilities to be understood in verbal and written communications 4. Can teach a concept and test for understanding 5. Can interpret feedback or messages
Physical mobility is sufficient to fulfill classroom, clinical, and program objectives safely and effectively.	1. Can maintain balance in any position and can stand on both legs for long periods of time. Move from room to room in a timely manner, maneuver in small spaces, & climb stairs. 2. Can freely move all joints through functional range of motion 3. Can achieve certification in cardiopulmonary resuscitation at the BCLS (Basic Cardiac Life Support) level
Strength (gross motor skills) and endurance are sufficient to safely fulfill clinical laboratory objectives and requirements.	1. Can stand and walk for 10 hours or more in a clinical situation 2. Can position, lift, and transfer patients from all surfaces without injury to the patient, self, or others 3. Can push or pull heavy objects, such as occupied hospital bed, without injury to patient, self, or others

THE RESPIRATORY THERAPIST CODE OF CONDUCT

The Respiratory Therapist Student Code of Professional Conduct is **supplementary** to the “Student Code of Conduct” published in the Wallace Community College Catalog. The faculty members of this program at Wallace Community College have an academic, legal and ethical responsibility to protect the public and health care community from inappropriate unprofessional conduct or unsafe behaviors in the practice of healthcare. Acceptance into the program commits the individual to abide by the Code of Professional Conduct. Each student will:

- Attain personal mastery of knowledge and skill in their designated health area through honest effort;
- Relate to those who receive your services with compassion, truthfulness, and respect;
- Relate to peers, teachers, and other caregivers in a spirit of collaboration and mutual respect;
- Recognize and honor privileged information from both patients and colleagues;
- Conduct him/herself in accordance with program policy and Wallace Community College policies.

Examples of unprofessional or unethical conduct include, but are not limited to:

- Conduct as determined by the faculty to be unbecoming or unethical in a person training to practice in a health-related field or detrimental to the interests of the public, patients, students;
- Fraud or misrepresentation of themselves for obtaining medical information on persons outside their realm of clinical/fieldwork experience;
- Making false or misleading statements regarding one’s level of skill or ability to treat persons;
- Use of any false, fraudulent or deceptive statement in any document connected with field of study;
- Engaging in inappropriate conduct with a patient;
- Impersonating another person licensed to practice in the health field;
- Use of substance(s) which impairs cognitive function and/or decision making;
- Conduct which is likely to deceive, and with potential to harm the public;
- Obtaining any payment for services by fraud or misrepresentation;
- Being found mentally incompetent or insane by a court of competent jurisdiction;
- Any offenses resulting in arrest which jeopardizes required cleared background check.

Unprofessional or Unethical conduct could mean immediate dismissal from the program.

I have carefully read the Wallace Community College Respiratory Therapist Professional Code of Conduct and hereby declare that I will adhere to this code from the time of signing and throughout my enrollment in a health program at Wallace Community College.

POLICIES AND PROCEDURES

HEALTH & CLINICAL RECORDS POLICY

Validation and documentation of required health records must be received in the RPT Program Office by all students enrolled in the RPT program. **Students that fail to submit required records by the announced deadline(s) will not be allowed to continue in the program.**

NOTE: *Any changes or updates will be communicated, as needed. WCC operates in conjunction with local clinical facilities and all respiratory therapist students are subject to the requirements of those facilities in order to complete clinical respiratory therapist courses. Examples of this would be requirements for annual flu vaccination or COVID19-related documentation.*

All students are required to have a physical examination at the student's expense. The physical examination / health requirements protect the student by identifying any potential or real health problems that may be exacerbated by the demands of the clinical portion of the program.

Health professions are strenuous, both physically and psychologically. The student's ability to handle these demands must be established. It is also imperative that students do not expose clients or agency personnel to communicable disease or risk their safety, due to the inability to handle the physical or psychological stress of client care.

The following are required for ALL students:

- **PHYSICAL EXAMINATION** – A **physical examination**, completed within the past year, is required for all new students. The physical must be signed by a licensed physician or nurse practitioner. The examination must be documented on the Program's **essential function form** as required by The Alabama Community College System. New students and any student returning to the Respiratory Therapist Program program after an absence of one (1) year must submit current completed health forms.
- **IMMUNIZATIONS / TITERS** – It is the student's responsibility to keep all health records current. **Documentation of any required updates should be submitted to the RPTs Secretary's Office as soon as possible.** In addition to the following requirements, additional items may be requested, as deemed necessary by local clinical facilities. At minimum, the following are required:

Tetanus (Tdap) Vaccine

Students entering the RPT program must provide documentation of an adult **Tdap vaccine** (tetanus, diphtheria, and pertussis). If the documented Tdap vaccine is over ten (10) years old, documentation of a Td (tetanus and diphtheria) or Tdap booster that is less than ten (10) years old is also required. An update is required every ten (10) years.

TB Skin Test

A **two-step** TB Skin Test is required to enter the RPT program. This consists of one test followed by a second test 7-21 days

later. The results cannot be more than four (4) weeks apart. *An annual one-step TB Skin Test is required each subsequent year.*

In lieu of a two-step TB Skin Test, students can present documentation of a **TB blood test**. *An annual TB blood test or one-step TB Skin Test is required each subsequent year.*

Students who are unable to receive the TB skin test due to a previously positive TB result or previous BCG vaccination, must submit documentation stating such along with documentation of a clear **chest x-ray**. Completion of an annual *Tuberculosis Questionnaire* (provided by the WCC health program) will also be required.

MMRV Titer

A **MMRV (Measles, Mumps, Rubella, and Varicella) titer** is required to enter the RPT program.

If any results are negative or non-immune, the student must sign the *MMRV Waiver Form* (provided by the WCC health program) and submit it with the negative or non-immune results. The student is advised to consult with a physician regarding precautions to prevent infection.

Proof of vaccination is not required and will not be accepted in place of titer results.

Hepatitis B

A **Hepatitis B titer** is required to enter the RPT Program.

If the results are negative or non-immune, the student must sign the *Hepatitis B Waiver Form* (provided by the WCC health program) and submit it with the negative or non-immune results. The student is advised to consult with a physician regarding precautions to prevent infection.

Proof of vaccination is not required and will not be accepted in place of titer results.

Flu / COVID / Fit Test

To comply with current clinical agency requirements, students will submit an **annual Flu Survey** with copy of vaccination (if received), an **annual COVID-19 Survey** with copy of vaccination (if received), and **annual Fit Test** (for face mask).

CPR

Students are required to maintain **current Basic Life Support (BLS) CPR**. CPR certification must come from an American Heart Association or American Red Cross provider. **NO ONLINE ONLY CPR CERTIFICATIONS WILL BE ACCEPTED.**

Clinical Training Forms Each clinical facility we use has policy and procedural documentation required for students to participate in clinicals at their location. These training forms will be assigned upon entry to the program and are required by a given deadline prior to attendance in clinicals.

- **CONTINUING HEALTH STATUS** – It is a student’s responsibility to notify the respiratory therapy faculty of any changes in his/her health status, i.e., pregnancy, surgery, injuries, etc. Additional examinations from a health care provider, with documentation of results, may be required by an instructor for any changes in a student’s health status.
- **PROFESSIONAL LIABILITY INSURANCE** – Students in the RPT program are required to purchase professional liability insurance (malpractice insurance) through the College, each semester they enroll in a respiratory therapist course with a clinical component. This fee is automatically added at the time of registration in applicable RPT courses. The blanket policy only provides coverage for **incidents occurring during required clinicals** and it expires at the end of each term.
- **HEALTH INSURANCE** – Wallace Community College and the RPT Program **do not provide health insurance coverage** for students. Students are responsible for costs incurred as a result of an accident/injury in the clinical or college laboratory. This may include follow-up testing and/or treatment mandated by the program/clinical agency. Students are not entitled to any Workmen’s Compensation benefits from agencies. Health insurance coverage is strongly recommended.

Important Information for Health and Clinical Records

1. It is the student’s responsibility to ensure that all records are submitted and are up to date. **ANY STUDENT WHO FAILS TO MEET ANNOUNCED DEADLINES FOR EACH SEMESTER WILL BE REMOVED FROM CLASS, LAB, CLINICAL, ETC. AND WILL NOT BE ALLOWED TO RETURN UNTIL ALL RECORDS ARE IN COMPLIANCE.**
2. Updates to health records may be required while a student is enrolled in the RPT program, i.e. TB skin test, CPR, Tdap, etc. **ALL UPDATES MUST BE PRESENTED ON THE FIRST DAY OF CLASS AND MUST BE GOOD FOR THE ENTIRE SEMESTER.** For example, TB skin tests are required annually for all students. If the semester begins on January 10th and ends on May 5th, and your TB skin test expires March 3rd, you will have to update your information prior to January 10th in order to have it available for class and to be current for TB throughout the semester.
3. **STUDENTS MUST KEEP PERSONAL COPIES OF ALL HEALTH-RELATED RECORDS.** Re-submission of records may be requested by RPT Program personnel at any time. Copies of records WILL NOT be provided back to students. In the event the student requires a copy of any health-related record, he or she must seek it from the original source, i.e., the healthcare provider.

In addition to program specific policies the Respiratory Therapist student is expected to abide by general student policies as stated in the WCC College Catalog and Student Handbook.

All respiratory therapist program students must maintain a grade of "C" in all courses in the curriculum in order to progress to the next term of instruction or to graduate. Students who fail to achieve a "C" or above in a major required course cannot progress and must withdraw from the Program but can apply for readmission. **A minimal grade of 75 constitutes a "C" in Respiratory Therapist courses.**

As outlined in the catalog all RPT students must achieve a grade of 80% or greater on each **Clinical Proficiency Examination** in order to progress to the next term of instruction or to graduate from the program. Only one retest per term will be permitted. However, the original grade will be used for the overall average for that course. The Clinical Proficiency Examination will be scheduled well in advance of the testing date, and will usually be preceded by a review session.

A course syllabus for each respiratory therapist course will be provided to each student stating the grading policy for that specific course. The grading policy for each course is based upon the discretion of each individual instructor as stated in the course syllabus.

RPT Courses and Grades

Grading System

90-100	= A
80-89	= B
75-79	= C
60-74	= D
59-below	= F

Course taught by the RPT Program

1. The student receives a grade according to his/her level of performance in each course. Patient care demands at least a minimal level of competence; therefore, the student must achieve a "C" level of performance for progression to the next respiratory care sequential course. If a student scores less than the minimum required passing score, he/she will be allowed to retest only once after a conference for remediation with the Program Director and Director of Clinical Education. If the student scores less than the required minimum passing score on the retest the student will not be able to successfully complete the course objectives and a grade of "F" will be assigned at the end of the term unless the student initiates a course withdrawal request according to current college policy.
2. The student must perform all of the criteria for RPT laboratory practical with a minimal competency grade of "C". A student receiving a grade of "D" or below for his/her performance on the laboratory practical must withdraw from the RPT program. Students who withdraw or are unable to progress in the RPT program may apply for readmission the following year.

The faculty reserves the right to require that a student demonstrate the minimally acceptable achievement in all portions of the program whether this be a unit of work within a course or the total course content.

3. If a student develops a pattern of poor practical exams, intervention from the course instructor to remediate the situation may be as follows:
 - a. **The student** will schedule a conference with the instructor to discuss the student's grade and possibly determine reasons for the failing grade.
 - b. After the instructor and student determine reason(s) for the grade, if appropriate, the instructor and student will make remediation plans regarding the student's grade. This will be done in one or several ways, such as:
 - 1) Read material pertaining to laboratory practical again, as well as additional material for better understanding.
 - 2) Write report or case study on material field.
 - 3) Other variables in assisting student to improve:
 - c. The instructor has the final decision in how remediation should be handled.
 - 1) If the student cannot or will not comply with the instructors intervention or if the student receives a "D" or below, the student must withdraw from the RPT program.
 - 2) If a student receives a grade of "D" or below in any RPT course he/she must withdraw from the RPT program

Attendance

A. Class

NOTE: Students are expected to be in class EVERY CLASS DAY AND ON TIME. Students are expected to attend all classes for which they are registered. Students should recognize at the beginning of their college career that a mature acceptance of their academic responsibilities is a requisite for accomplishment in college work; this applies particularly in the area of class attendance. Policies on workbooks, assignments, in-class projects and missed exams are addressed on each course syllabus. Allied Health Programs are extremely demanding of student time and energy and even one missed class day can result in academic difficulty. In order to meet the requirements for program completion in a CoARC accredited Respiratory Therapy Program and to be eligible for NBRC exams students are required to have sufficient quality and duration to meet program goals and acquire the competencies needed to practice in the Respiratory Therapy profession.

B. Absence

Upon **the Second absence** in any given course or clinical, the student will be referred to the Program Director and/or Director of Clinical Education for counseling.

C. Clinical

See Attendance policy under clinical policies and procedures

Guidelines Concerning Attendance in RPT Lab Courses

Attendance for laboratory practice is strongly encouraged. The laboratory instructor will keep daily records to include absence, tardiness, and early departures. Success in the courses and the program are strongly related to laboratory participation.

NOTE: **Students are required to wear their clinical uniform (scrubs & Lab coats) to all labs.**

Guidelines Concerning Examinations, Quizzes, and Make-Up Work

- A. Daily quizzes, pop-tests, laboratory assignments, or other work which generates a daily grade **will not qualify** for make-up work. If an absence results in a missed daily grade, then the daily grade will stand as a **zero**. The decision to make exceptions to this rule rests with the individual instructor and individual situations would be considered only in light of "special circumstances".

- B. **Major Examinations** are those examinations that count more than 20% of the final grade as a single test grade and will follow the RPT course calendar in Canvas. **Major Examinations** qualify for make-up work if the absence is considered excused. It is the responsibility of the student to schedule a make-up examination with the instructor immediately upon return to school. The request for make-up work should be rendered in writing. If the student does not schedule make-up with the instructor within **TWO days** after their return to classes, then the instructor may not allow a make-up examination and the grade will stand as a zero. **The highest possible score on a major exam that must be rescheduled due to absence is 85%.**

Major Examinations will always be scheduled well in advance, therefore if an absence is anticipated on an exam date; the student should notify the instructor in advance of the date of testing.

Program Completion/Readmission Policy

- A. It is neither implied nor stated that a student enrolled in the Respiratory Therapist Program will complete their degree in a two year period. Actual program completion time will be determined by successful fulfillment of **all** program requirements. The time required for program completion will be affected by successful completion of all program requirements on a timely basis, student's course load per semester, and the availability of faculty, classes and laboratory competencies.

- B. Students who withdraw or are unable to progress in the Respiratory Therapist program may apply for readmission. The Respiratory Therapist Admissions Committee will consider readmission requests on an individual basis. Decisions regarding readmission will be based on program readmission policies in effect at the time of request and availability of openings. Students must apply for readmission by writing a letter to the Respiratory Therapist Admissions Committee, Respiratory Therapist Program, Wallace Community College, 1141 Wallace Drive, Dothan, AL, 36303. To allow timely

scheduling of the readmission examination, this letter should be postmarked no later than 60 days prior to the desired date of readmission. Failure to submit this request on time will result in denial or delay of readmission. **To complete readmission requirements, students must achieve a passing score (80%) on a readmission examination.** The readmission examination will be composed from the content of the last *Cumulative Clinical Proficiency Examination* and *Clinical Skills Examination* successfully completed by the student. Failure to achieve a passing score on the readmission examination will result in denial of readmission.

Attitude

Students are expected to demonstrate interest, ability, and aptitude for responsibilities as a RPT student. Unsatisfactory conduct may be considered grounds for probation or dismissal from the RPT Program or the college. Disregard for patient's welfare, disinterest in studies (as shown by frequent tardiness and absences), failure to cooperate in class assignments and discussions, being disruptive in the classroom, and dishonesty on written examinations are examples of behaviors that can be interpreted as unsatisfactory conduct. All instructors reserve the right to dismiss a student from the classroom if disrespectful or disruptive behavior is exhibited toward the instructor(s) or fellow students.

Student Regulations

The RPT Program abides by the policies and procedures set forth by Wallace Community College and the Respiratory Therapist Program.

Physical and/or Mental Disability

In the event that a student incurs a physical and/or mental disability while in the RPT Program, the student will be maintained only if the disability does not inhibit the effectiveness of the student in the clinical areas and does not present a safety hazard for patients, other students, or personnel. If an individual's health changes during the program of learning, so that the essential functions cannot be met with or without reasonable accommodations, the student will be withdrawn from the respiratory therapy program. The respiratory therapy faculty reserves the right at any time to require an additional medical examination at the student's expense, in order to assist with the evaluation of the student's ability to perform the essential functions.

Disruptions

Cell phones, pagers, and other electronic communication devices are prohibited at clinical or during classroom or laboratory instruction. Students are not allowed personal use of the telephones at clinical sites.

Class should never be interrupted by activation of these devices. Use of these devices in Respiratory Therapist professional courses is considered unprofessional behavior. An emergency situation must be approved by the instructor before class.

SOCIAL MEDIA POLICY FOR RPT STUDENTS

Purpose:

To provide guidelines and identify prohibited conduct and best practices regarding RPT students'

general use of social media. Students are advised to use social media cautiously. Distribution of sensitive and confidential information, intentional or unintentional, is protected under HIPAA and FERPA whether discussed through traditional communication channels or through social media.

When publishing information on social media sites, remain cognizant that information may be public for anyone to see and can be traced back to you as an individual. Since social media typically enables two-way communications with an audience, individuals have less control about how materials posted will be used by others.

Definitions:

Social media are defined as mechanisms for communication designed to be disseminated through social interaction, created using highly accessible and scalable publishing techniques. Social media is commonly thought of as a group of Internet-based applications that are built on the ideological and technological foundations of the web that allows the creation and exchange of user-generated content. The term “social media” includes, but is not limited to: web and mobile phone applications, blogs, photo and video sharing sites, micro-blogging and social networking sites, and wikis. Examples **include but are not limited** to LinkedIn, Wikipedia, Second Life, Flickr, podcasts, Twitter, Facebook, YouTube, Snapchat and Instagram. Regardless of how these forms of social media are used, students are responsible for the content they post or promote. Content contributed on these platforms is immediately searchable and shareable, regardless of whether that is the intention of the contributor.

Other electronic means shall mean any other web-based or mobile technologies by which users can communicate electronically, including, without limitation, text messaging, electronic messaging platforms (e.g., Whatsapp), and video-conferencing technologies (e.g., Zoom, Facetime, MS Teams,etc.).

General Use of Social Media:

- A. RPT students are **prohibited** from engaging in the following conduct in connection with their use of social media:
 1. Accessing, posting information on, or communicating through social media or other electronic means, during didactic, clinical or volunteer activities of the program, unless approved by the course instructor as part of a course assignment or activity.
 2. Posting or distributing photographs or videos obtained during any didactic, lab or clinical session, through social media or other electronic means, unless approved by the course instructor as part of a course assignment or activity.
 3. Posting information on social media, or through other electronic means, about, or images of, a patient, fellow student, instructor or research subject, including references to the

health care of family members, employment or employers, conditions, locations of treatment, or any circumstances surrounding a situation, which violate federal or state privacy laws, including without limitation, HIPAA and FERPA. Accordingly, the use of social media for clinical discussions that include any identifiable information related to patients or affiliated clinical facilities is prohibited.

4. Posting negative, disparaging, harmful, racist, homophobic, derogatory, or unprofessional remarks or gestures about the college, fellow students, instructors, patients (either a generalized or specific group of patients, or an individual), patient visitors, clinical sites, or other health care professionals through social media is strictly prohibited. This will be considered unprofessional and a form of misconduct.
5. Students must not save or transmit confidential, identifying or sensitive patient information on your personal computer or other electronic device.
6. Email or texting correspondence with faculty should be treated as public and should not include patient identifying information.

Consequences:

- Violations of patient privacy with an electronic device will be subject to HIPAA procedures/guidelines and consequences. In the event that a student is found to have violated the RPT Social Media Policy, the student will be subject to disciplinary action.
- **Students whose behavior does not comply with these professional standards will receive sanctions that may include but are not limited to a lower or failing grade in a course or clinical component of a course, immediate removal from a course (i.e., administrative drop), or dismissal from the respiratory therapist program.**
- Each student is legally responsible for individual postings and may be subject to liability if individual postings are found defamatory, harassing, or in violation of any other applicable law. Students may also be liable if individual postings include confidential or copyrighted information (music, videos, text, etc.).
- **Students must be aware that the clinical agency has the contractual right to prohibit a Health Division student from being placed at the agency.** Students must conform to the rules, policies, and procedures of the clinical affiliate in order to participate in clinical learning experiences. If a student is prohibited from being placed at any of our contracted facilities, the student cannot continue in the program.

Clinical Attendance

The student is expected to attend **ALL** clinical rotations at their scheduled times. Tardiness or absenteeism is not acceptable. The attendance habits developed in this program will carry over into the student's professional life after completion of the program. The hospitals take note of the attendance patterns of the students and this is a determining

factor regarding potential employees. The attendance policy will be adhered to without exception.

Each student receives a daily grade on each assigned clinical day. These daily grades will not qualify for make-up work. Therefore, any clinical absence will result in a zero for the daily grade until makeup policy has been followed and makeup day completed.

Students enrolled in the respiratory therapy program clinical courses are subject to failing to successfully complete the clinical course objectives when they accumulate **more than** the following number of absence:

RPT 210	1 CLASS MEETING
RPT 220	1 CLASS MEETING
RPT 230	1 CLASS MEETING
RPT 240	1 CLASS MEETING

Students who accumulate more than the allowable NUMBER of absences will be unable to complete course objectives and therefore a grade of “F” will be awarded upon course completion unless the appropriate make-up procedures are followed or the student initiates a request for withdrawal according to current college policy.

If the absence is of an excusable nature (as determined by program faculty) make-up time MAY be allowed. This would allow the student to continue in the program.

Application for make-up time must be made to the Clinical Director utilizing an appropriate request form.

- A. Any absence must be reported to the clinical instructor 30 minutes prior to the scheduled time. The Director of Clinical Education (DCE) must be notified as well. Failure to notify the clinical instructor and DCE will result in the student being placed on probation. The second occurrence may result in the student being dismissed from the program.
- B. Any student that arrives after the scheduled clinical and lab time will be sent home, receive a zero for the day and will have to follow the make-up policy for clinical and lab absences. For all RPT on campus theory classes, students are expected to attend all classes and be on TIME!
- C. The DCE must document that each student attends all of the clinical time they are assigned each semester. Therefore, **all clinical time missed must be made up.**
- D. **All** make-up days must be approved through the Director of Clinical Education (DCE). The student must make-up time missed within two weeks of the absence.
- E. If a student fails to attend a make-up day, another absence will be recorded in the attendance record and the student will be placed on probation. Upon the second occurrence of this nature the student will be dismissed from the program. **It is the**

student's responsibility to see that all make-up days are approved through the DCE's office.

- F. Although making up missed clinical time is required, it will not remove the absence from the student's attendance record. The day missed could still adversely affect the student's clinical grade.
- G. If the student must leave the clinical site early, the time must be made up within the following week. The student will not be allowed to stay past the designated clinical time to leave early at a future date. Missed hours can only be made up after they are missed.
- H. Students are not permitted to contact the clinical sites directly regarding clinical schedule changes. They must be coordinated through the Director of Clinical Education. Failure to comply will result in an absence for the day(s) affected.
- I. Failure to follow the assigned clinical schedule times and locations without prior faculty approval will result in an **absence** for the day(s) and **Clinical Suspension**. Upon the second occurrence the student will be dismissed from the program.
- J. Any clinical days missed due to disciplinary action will be subject to a reduction in the clinical grade as per policy for daily grades in clinical or lab.
- K. All Respiratory Therapy seminars or meetings attended in lieu of clinical days will be documented with a paper written by the student describing the content of the event. The paper is to be attached to a daily evaluation form and turned in as usual on the next day of class.

Application for make-up time must be made to the Clinical Director utilizing the appropriate request form.

The following procedure must be strictly followed in order to ensure that make-up time is allowed. If the student fails to complete the make-up procedure according to policy, they will be unable to meet course objectives and would be awarded the grade of "F" at the end of the term unless they initiate a withdrawal request according to current college policy.

- A. **FORM "A"** documenting a clinical absence and requesting make-up must be submitted to the Director of Clinical Education on the **FIRST** day the student returns to classes. **Failure to submit FORM "A" on the first day of return to classes** will result in the student being unable to make-up the absence and a grade of "F" will be issued at the completion of the course unless the student initiates a course withdrawal according to current college policy.
- B. **FORM "A"** should be used by the student to **explain** why the absence should be considered "excused". Excused status is not automatic and absences which are not considered excused will not qualify for make-up. Students should be specific in the

information provided on **FORM "A"** since this information will be used by program faculty to determine if the absence should be considered excused.

- C. **FORM "A"** must be completed by the student and submitted to the Director of Clinical Education in order to obtain **FORM "B"** (CLINICAL MAKE-UP DOCUMENTATION).

All make-up hours must be **scheduled** with a clinical instructor using **FORM "B"**. Any make-up hours not verified by a clinical instructor **will not** be accepted. **FORM "B"** must be submitted to the clinical instructor at the clinical site **BEFORE** any make-up work will be allowed. Form A and Form B are included in the student handbook.

- D. Approved make-up hours will be completed within two weeks of the first day the student returns to classes, at the time scheduled by the Director of Clinical Education. Make-up time will be scheduled on the shift and on days at the convenience of the clinical instructor.
- E. Once make-up time is scheduled with the clinical instructor the student must complete the make-up hours as scheduled.
- F. Clinical instructors will verify make-up hours using **FORM "B"**. **FORM "B"** must be completed and submitted with a completed clinical log sheet at the end of the clinical session.
- G. Exceptions to this strict policy will be made only in rare circumstances. The decision to modify any of these policy provisions rests with the Director for Clinical Education and Program Director.
- H. Students must submit a **written request** for consideration of any exception on the calendar day of their return from absence.

Competencies/Evaluations

- A. Each student will complete the prescribed clinical competencies as noted in their syllabi each semester, and a master list of the RPT competencies is provided below. The student must assure that these are completed. The proper sequence will be covered by the clinical director. It is the student's responsibility to see that all competencies are completed in the laboratory each semester. Clinical competencies are to be completed in accordance with the clinical course syllabi and the clinical core competencies master document.
- B. If the student receives an evaluation that is unsatisfactory, or less than satisfactory they will be counseled. Upon the second unsatisfactory evaluation, the student is on probationary status and re-evaluated by the Director of Clinical Education. Upon the third unsatisfactory evaluation, the student will be dismissed from clinical resulting in dismissal from the program. No Exceptions!
- C. Failure to safely perform a critical skill in the clinical setting will result in remediation of the student. Upon the second failure the student will be dismissed from the program.
- D. Evaluations are turned in to the designated faculty weekly. These evaluations are to be completed by the preceptor. Any information that is forged will result in expulsion from the program.

RPT CLINICAL COMPETENCIES

RPT 210	Handwashing Vital signs Isolation procedures Physical assessment Oxygen administration Humidity and Aerosol Administration Small volume neb MDI administration Pulse ox monitoring
RPT 220	Arterial Line sampling Arterial puncture CPT Endotracheal suctioning Nasotracheal suctioning Flutter valve Chest vest IS IPV Manual resuscitation PEP mask

RPT 230	Changing vent circuit CPAP Extubation Initiation of Continuous Mechanical Ventilation Initiation of Newborn Continuous Mechanical Ventilation NIV Pressure Support Setup/Monitoring Transcutaneous Monitoring Monitoring Cuff pressure Monitoring Newborn Mechanical Ventilation Waveform Analysis Monitoring Continuous Mechanical Ventilation Arterial Line Monitoring
RPT 240	Arterial line Bedside PFT Bronch assist Intubation Trach Care

Clinical Grades and Evaluation Tools

All students are recorded and accessed in the Trajecsys ® program utilized by the program and obtained through the WCC Bookstore. Students are required to keep updated and accurate records of clinical attendance and performance in the system. Students are required to clock in at the Clinical Center daily, using the Trajecsys ® program.

Each student receives a daily grade. The grade consist of the daily evaluation tool which includes the clinical log sheet of activities performed during the clinical rotation for each assigned clinical day. These documents are provided for the student in this handbook to assess prior to beginning clinical rotations. Clinical absence will result in a zero for the daily grade until makeup policy has been followed and makeup day completed.

Each student will be evaluated by the clinical instructor who was in charge during the student's clinical rotations for each particular clinical area. Grade computation may vary from semester-to-semester. Grade composition for each semester will be provided to the student at the beginning of each semester.

Students are accountable for completing all components of the clinical grade. The student will receive a grade of "I" until all components are completed. If after six (6) weeks the grade is not changed, it becomes an "F".

Wallace Community College and the Respiratory Therapist Program are **adult** educational programs. Students are expected to conduct themselves as adults and attend classes in a responsible manner. When absences do occur, the student must understand the impact they may have on academic progress within the program.

**WALLACE COMMUNITY COLLEGE

Psychomotor Task Evaluation

Clinical faculty routinely uses the following scoring system when evaluating student performance of specific tasks in **5 categories**, for which there is a **total of 100 points possible**.

**Each category is worth:
0 points to 20 points.**

A task score of 0 in the safety task may result in the student's removal from the clinical site and/or a mandatory remedial counseling session with the DCE and/or Program Director.

Failure of the clinical component of the course will occur if a student incurs "0's" on three different days throughout the clinical experience. The student must also meet the requirements for the number of successful care plan as determined by the Director of Clinical Education. Care plans that are not submitted on time per the clinical instructor's requirements will receive a grade of 0 as per the rubric.

Clinical Policies and Procedures

The following policies are applicable to the Respiratory Therapist Program at Wallace Community College. Any breach of these policies may lead to failure of the course in which the student is registered; dismissal from the program; dismissal and/or expulsion from the Health Division or College based on the severity of the breach. All offenses are categorized according to severity, and penalties are assigned according to the category of offense. A copy of the Wallace College, Dothan Respiratory Therapist Program Student Counselling report is included in this handbook to acquaint each student with its content.

Affiliate Specific Orientation (Aso)

Although Respiratory Therapy is fairly standardized, each clinical affiliate may have specific guidelines that must be recognized. Therefore, each clinical rotation may also require an "Affiliate Specific Orientation" which must be completed prior to attending clinical.

Dress Code

Approved WCC, Dothan Uniforms (white lab coat with collar, Cherokee Revolution scrubs/Grape, and white clinical shoes) and identification badges are to be worn for all learning lab, clinical rotations and lectures or library activity on non-clinical days. If a student is out of uniform or does not have the identification badge, they will be sent home, and required to make-up the clinical time at a later date.

ALL CLINICAL SHOES MUST BE COMPLETELY WHITE. ABSOLUTELY NO CLINICAL SHOES WITH BRIGHT COLORS ALLOWED.

NOTE: THE APPROVED RESPIRATORY THERAPY CLINICAL UNIFORM MUST BE WORN ANYTIME A STUDENT IS AT A CLINICAL SITE OR ON CAMPUS FOR LAB/SKILLS SCHEDULED TESTING DATES. IF REPRESENTING THE PROGRAM FOR A SPECIAL EVENT, UNIFORM MUST BE WORN FOR THESE OCCASSIONS.

Make-up should be kept to a minimum. **THE ONLY JEWELRY THAT STUDENTS ARE ALLOWED TO WEAR DURING CLINICAL AND LAB ARE WEDDING RINGS.** No necklace, bracelets, earrings, etc. Only one second hand watch will be allowed in the clinical setting. Nail polish is not permitted. Fingernails should be kept clean and professional during clinical rotations! No long or acrylic nails.

ABSOLUTELY NO EARRINGS OR OTHER BODY PIERCING ARE ALLOWED.

Conservative tastes should be your guide to discretion. Hair must be worn up off the collar. All TATOOS must be covered up and not visible in the hospital or other clinical setting.

Personal Appearance

- A. Good Personal Hygiene
- B. Beard and/or moustache should be well groomed.
- C. Hair should be kept neat. If hair exceeds shoulder length, it must be confined while in the clinical area to promote safety and prevent contamination.
- D. Fingernails must be kept clean and trimmed to moderate length. Only clear fingernail polish is permitted. (False nails are not permitted)
- E. Jewelry is restricted for all students to a watch with a second hand, wedding rings. No decorative necklaces, bracelets, program insignia, or other pins are allowed to be worn. **Medic Alert jewelry may be worn if necessary. Medic Alert necklaces that can be tucked under the uniform are preferred.**
- F. The use of tobacco products while on College property as well as Clinical Site property is strictly prohibited. In accordance with the College's Tobacco-Free Policy, a *tobacco product* is defined as all tobacco-derived or containing products, including and not limited to, cigarettes (e.g., clove, bidis, kreteks), electronic cigarettes, cigars and cigarillos, hookah smoked products, pipes and oral tobacco (e.g., spit and spit less, smokeless, chew, snuff) and nasal tobacco. It also includes any product intended to mimic tobacco products, contain tobacco flavoring or deliver nicotine, to include water vapor emitting products.
- G. No perfumes or colognes permitted.

Violation of any of the above policies will result in the student being sent home from the clinical site and will be counted absent.

Repeated counseling concerning the dress code can result in the student being dismissed from the clinical course. This would require that the student withdraw from the course according to college policy or be awarded the grade of "F" at the completion of the course for failure to meet course requirements.

Student Responsibilities

All students are expected to act in a mature, self-disciplined manner at all times. This behavior is necessary for the promotion of academic excellence and is outlined thoroughly in the Wallace Community College Catalog. It is suggested that the student take the time to review the Wallace Community Catalog issued by the College and available on the WCC website.

Professional Code of Conduct for Students in the RPT Clinical Phase

The student who is involved in the clinical education phase is responsible not only to Wallace Community College, but to the hospital; and ultimately to the patient as well. Students must be aware that the clinical agency has the contractual right to prohibit a RPT student from being placed at the agency. If the program is unable to place the student for completion of course or program requirements, the student will be required to withdraw (or will be administratively withdrawn) from the course/program.

NOTE: The instructor reserves the right to alter or modify these policies and guidelines in order to be in compliance with CoARC and the NBRC.

Student Behavior

While at the clinical sites, all students are expected to behave in a professional manner. Conduct should never be disruptive to patients or employees. Loud talking, horseplay, profanity, abusive language, or the use of alcohol or other drugs will not be tolerated. The use of tobacco products (including smoke-less tobacco) while at clinical is strictly prohibited. During school or clinical time a student who engages in inappropriate conduct will be asked by the designee to leave the hospital premises and will receive disciplinary action according to the Wallace Community College Student Handbook section in the College Catalog.

Student/Preceptor Relationship

Students are expected to maintain a respectful attitude toward the preceptor and/or the designated staff member(s). Students should follow the directions as given unless the student feels uncomfortable or lacks the skill(s) to perform the services. Students should seek clarification of any procedure that he/she feels is unfamiliar.

The ultimate responsibility for patient care lies with the staff of the rotation site. If a conflict arises between the student and anyone at the rotation site, the student will immediately retire from the conflict and notify the Director of Clinical Education or Clinical Instructor as soon as possible or no later than the completion of the shift.

Falsification Of Records

Dishonesty, cheating, or stealing, in any form, will not be tolerated. Students falsifying information, to include documentation on patient's records or student's records, will receive disciplinary action according to the Wallace Community College Catalog.

Student/Patient Privacy

All Respiratory Therapist students are held to the professional, legal, and ethical parameters of the Health Information Privacy and Accountability Act (HIPAA). Students must always respect the rights of the patients. These rights include the right to privacy, the right to dignity, the right to confidentiality of information, and the right to a sympathetic and compassionate understanding of the fears and insecurities which go along with being ill and hospitalized. The patient should always be treated as an individual of worth and dignity. The behavior of the student should inspire calm and confidence in the patient and should never be abrupt, hostile, condescending, or in any way unsettling to the patient.

Disruptions

Students are not allowed to have visitors during clinical hours. Electronic Communication devices are **Strictly Prohibited** in the clinical areas. The clinical supervisor (instructor, preceptor) or the clinical contact identified by the Program Director or Clinical Education Director is the emergency contact for the student's family or significant other.

Smoking / Eating / Drinking

Eating, or drinking is allowed in certain approved areas. Wallace Community College is a Tobacco free campus. **ABSOLUTELY NO SMOKING ALLOWED ON CAMPUS OR AT ANY CLINICAL SITE. No exceptions.**

Identification

All students are required to have a photo identification badge to utilize clinical agencies. The student is responsible for the cost of the photo ID and any replacement. Students will be dismissed for the day from the clinical experience if he/she does not have the ID badge in full sight while in the clinical agency.

RPT Courses Cannot Be Taken As Audit

It is now the policy of the Respiratory Therapist Program that no courses within the RPT curriculum will be made available for audit. This policy is effective as of February 7, 2002. Courses within the curriculum must be taken for credit even if a student chooses to repeat a course that has already been successfully completed.

Repeating RPT Course For Credit

If a student chooses to repeat an RPT course, that student is responsible for adherence to all rules, requirements, policies, and procedures. Failure to comply can result in counseling. Repeated counseling will result in the student being dismissed from the RPT program without the possibility of readmission. These guidelines and policies apply to all courses within the respiratory care curriculum. Other rules may apply to certain courses and the student is directed to each individual course's syllabus for more specific information concerning each individual course.

Standards of Professionalism

If at any time, a student disregards standards of professionalism or engages in behavior which endangers their self or others, he/she may be immediately removed from the clinical site. In this event, the student and the designee should contact the Director of Clinical Education.

Students who are deemed clinically incompetent will be removed from the clinical area. Repercussions are dependent on review of the allegations, demonstration by the student of the skills at the expected level of performance, and evaluation of the student's progress in the program. Repercussions are at the discretion of the reviewer(s).

Drug Testing

All RPT students must submit to initial and continuing drug testing at specified intervals, for cause or at random. Should the student refuse to abide by agency/WCC policy he/she will be administratively withdrawn from the course and may be denied readmission to the same or any other WCC health program.

Clinical Rotation Compensation

Each student will be required to sign the Student Clinical Rotation Contract prior to starting clinical rotations (see Student Clinical Rotation Contract form below)

Wallace Community College
Associate Degree Respiratory Therapist Program
STUDENT CLINICAL ROTATION CONTRACT

Student Name: _____

Student ID #: _____

I, _____, understand that the primary
(Student Name)
objective of the Respiratory Therapist program at Wallace Community College is to prepare program graduates to perform competently as a safe, professional respiratory therapist. In order to achieve this objective, it is necessary that each student complete _____ hours of clinical experience in a health care facility. Such experience is educational in nature and is designed to develop each student's professional skills in order that each student may demonstrate specific entry-level competencies upon program completion. Program objectives and entry-level competencies are stated in the College catalog.

As a condition for enrolling in the Respiratory Therapist program and subsequently participating in clinical experiences at _____ to satisfy the requirements of
(Health Care Facility)

_____ during the _____
(Course Name and Number) (Semester)

semester, I, _____, understand that:
(Student Name)

1. I am a student at the College, enrolled in a clinical course requiring my presence at a health care facility;
2. I am not acting as an employee of the institution or of the health care facility
3. I am not expecting and will not receive compensation for participation in the clinical course from either the institution or the health care facility;
4. I have not been promised and am not expecting to be offered a job at the health care facility as a result of participation in the clinical course.

Student Remediation Policy

Standard Reference

This policy addresses CoARC Standards related to:

- Student evaluation and documentation of competencies
- Fair practices and due process
- Clinical safety and supervision
- Programmatic assessment and continuous quality improvement

Narrative Description of Policy

The Respiratory Therapy Program has a formal, written remediation policy that ensures early identification, documentation, and correction of student deficiencies in the cognitive, psychomotor, and affective learning domains.

Student performance is systematically evaluated through:

- Written examinations
- Laboratory competency assessments
- Simulation activities
- Clinical performance evaluations
- Professional behavior assessments

Students who fail to meet established benchmarks are identified through routine faculty review of academic and clinical performance data.

Identification of Deficiency

Deficiencies may be identified in the following areas:

1. Cognitive (Didactic)

- Failure to achieve the minimum passing course grade
- Failure of summative or comprehensive examinations
- Inability to demonstrate required knowledge competencies

2. Psychomotor (Laboratory/Clinical Skills)

- Failure of skill check-offs
- Inability to perform procedures according to program standards
- Repeated procedural errors

3. Clinical Competency

- Failure to meet clinical objectives
- Unsatisfactory clinical evaluations
- Incomplete required clinical competencies
- Unsafe patient care practices

4. Affective (Professional Behavior)

- Unprofessional conduct
- Violation of clinical or institutional policies
- Breach of ethical standards

Remediation Process

When a deficiency is identified, the following process is implemented:

1. Written Notification

The student receives written documentation outlining:

- The specific deficiency
- Expected performance standards
- Required corrective action
- Timeline for completion

2. Development of a Written Remediation Plan

A formal remediation plan is developed by the course instructor and/or Clinical Director. The plan includes:

- Measurable learning objectives
- Assigned remediation activities
- Method of reassessment
- Clear deadline for completion
- Consequences of unsuccessful remediation

The student signs the remediation plan acknowledging receipt.

3. Implementation of Remediation Activities

Remediation strategies may include:

- Faculty tutoring
- Structured study plans
- Additional laboratory practice
- Simulation reassessment
- Additional supervised clinical experiences (if permitted)
- Professional conduct contracts

4. Reassessment and Outcome Determination

Students are formally reassessed using objective measures. Outcomes may include:

- Successful completion
- Extended remediation (if appropriate)

- Course failure
- Clinical failure
- Program dismissal

Clinical Safety Provision

Patient safety is prioritized at all times. Students demonstrating unsafe clinical performance may be immediately removed from the clinical setting pending faculty review.

Reinstatement into clinical rotations requires documented successful remediation and demonstrated competency.

Documentation and Record Retention

All remediation documentation is maintained in the student's permanent academic file and includes:

- Written deficiency notice
- Signed remediation plan
- Evidence of reassessment
- Final outcome determination

Documentation is retained in accordance with institutional record retention policies and is available for accreditation review.

Due Process and Fair Practices

The remediation process follows institutional due process policies. Students are informed of:

- The deficiency
- The required corrective action
- Consequences of non-compliance
- Their right to appeal decisions through the institution's grievance procedure

The policy is published in the Student Handbook and applied consistently.

Continuous Quality Improvement (CQI)

Aggregate remediation data are reviewed annually as part of the program's ongoing assessment plan. The Program Director and faculty evaluate:

- Frequency of remediation
- Areas of recurring deficiency
- Impact on retention and outcomes
- Effectiveness of remediation strategies

Findings are incorporated into curriculum revisions and program improvement planning.

Remediation Lab successfully completed:
Student is able to return to clinical facility (if applicable). Advise if further lab time is needed.

AARC CODE OF ETHICS

As health care professional engaged in the performance of respiratory care, Respiratory Care Practitioners must strive, both individually and collectively, to maintain the highest personal and professional standards.

The principles set forth in this document define the basic ethical and moral standards to which each member of the American Association for Respiratory Care should conform.

The respiratory care practitioner shall practice medically acceptable methods of treatment and shall not endeavor to extend his/her practice beyond his/her competence and the authority vested in him/her by the physician.

The respiratory care practitioner shall continually strive to increase and improve his/her knowledge and skill and render to each patient the full measure of his/her ability. All services shall be provided with respect for the dignity of the patient, unrestricted by considerations of social or economic status, personal attributes, or the nature of health problems.

The respiratory care practitioner shall be responsible for the competent and efficient performance of his/her assigned duties and shall expose incompetence and illegal or unethical conduct of members of the profession.

The respiratory care practitioner shall hold in strict confidence all privileged information concerning the patient and refer all inquiries to the physician in charge of the patient's medical care.

The respiratory care practitioner shall not accept gratuities for preferential consideration of the patient. He/She shall guard against conflicts of interest.

The respiratory care practitioner shall uphold the dignity and honor of the profession and abide by its ethical principles. He/She should be familiar with existing state and federal laws governing the practice of respiratory care and comply with those laws.

The respiratory care practitioner shall cooperate with other health care professional and participate in activities to promote community and national efforts to meet the health needs of the public.

AARC Role Model Statement For Respiratory Care Practitioners

As health care professionals engaged in the performance of cardiopulmonary care, the practitioners of this profession must strive to maintain the highest personal and professional standards. A most important standard in the profession is for that practitioner to serve as a role model in matters concerning health.

In addition to upholding the code of ethics of this profession by continually striving to render the highest quality of patient care possible, the respiratory care practitioner shall set himself/herself apart as a leader and advocate of public respiratory health.

The respiratory care practitioner shall participate in activities leading to awareness of the causes and prevention of pulmonary disease and the problems associated with the cardiopulmonary system.

The respiratory care practitioner shall support the development and promotion of pulmonary disease awareness programs, to include smoking cessation programs, pulmonary function screenings, air pollution monitoring, allergy warnings, and other public education programs.

The respiratory care practitioner shall support research in all areas where efforts could promote improved health and could prevent disease.

The respiratory care practitioner shall provide leadership in determining health promotion and disease prevention activities for students, faculty, practitioners, patients, and the general public.

The respiratory care practitioner shall serve as a physical example of cardiopulmonary health by abstaining from tobacco use and shall make a special personal effort to eliminate smoking and the use of other tobacco products from his/her home and work environment.

The respiratory care practitioner shall uphold himself as a model for all members of the health care team by demonstrating his/her responsibilities and shall cooperate with other health care professionals to meet the health needs of the public.

ACKNOWLEDGEMENT

I have received a copy and reviewed the Wallace Community College Respiratory Therapy Program general departmental policies. I understand this policy and agree to abide by the rules of the College and the program. I also understand that failure to abide by the rules could result in dismissal from the RPT program without the possibility of readmission.

RESPIRATORY THERAPIST PROGRAM AAS CURRICULUM

Students may complete some or all of the general education (non-RPT) courses prior to admission to the Respiratory Therapist program. Prior to unconditional program admission, students must be eligible for ENG101, MTH100, and BIO201. RPT courses in terms below are

First Term (Fall)

EMS100*	Cardiopulmonary Resuscitation I	0-1
ENG101	English Composition I	3
ORI101 or 105**	Orientation to College or Orientation and Student Success	1-3
RPT210	Clinical Practice I	2
RPT211	Introduction to Respiratory Care	2
RPT212	Fundamentals of Respiratory Care I	4
RPT213	Anatomy and Physiology for the RCP	3
RPT214	Pharmacology for the RCP	2
TOTAL Credit Hours		17-20

Second Term (Spring)

BIO201***	Human Anatomy and Physiology I	4
MTH100	Intermediate College Algebra or higher	3
RPT220	Clinical Practice II	2
RPT221	Pathology for the RCP I	3
RPT222	Fundamentals of Respiratory Care II	4
RPT223	Acid/Base Regulation and ABG Analysis	2
TOTAL Credit Hours		18

Third Term (Summer)

BIO202	Human Anatomy and Physiology II	4
RPT231	Pathology for the RCP II	3
RPT234	Mechanical Ventilation for the RCP	4
RPT241	Rehabilitation and Home Care for the RCP	2
TOTAL Credit Hours		13

Fourth Term (Fall #2)

CIS146****	Microcomputer Applications	0-3
PSY200	General Psychology	3
RPT230	Clinical Practice III	2
RPT232	Diagnostic Procedures for the RCP	2
RPT242	Perinatal/Pediatric Respiratory Care	3
RPT244	Critical Care Considerations for the RCP	2
TOTAL Credit Hours		12- 15

Fifth Term (Spring #2)

EMS266	Advanced Cardiac Life Support Provider	1
Humanities/Fine Arts		3
RPT233	Special Procedures for the RCP	2
RPT240	Clinical Practice IV	4
RPT243	Computer Applications for the RCP	2
SPH106 or 107	Speech	3

TOTAL Credit Hours 15

Total Required Program Credit Hours: 75

***Or current certification in cardiopulmonary resuscitation at the health care provider level.**

****ORI 101, Orientation to College, if applicable (required of first-time college students)**

*****Pre-requisite: Completion of BIO103 with a “C” or higher or satisfactory performance on ACCS Biology Placement Exam. Students that have completed an Anatomy and Physiology course at WCC or another college and have received credit at WCC through the Office of Admissions and Records will not be required to complete BIO103 in order to meet curriculum requirements.**

******CIS 146, Microcomputer Applications – 3 credit hour or competency in computer science by passing a computer competency exam**
